

## **Army of Robust Air Purifiers (feat. IoT UV-C Tech) On Board @ Dorsett Wanchai** To Ensure the Best Air Quality & the Safest Stay in Every Guest Room

Upholding its **#DorsettCares promise** and **'Beyond Thoughtful' motto**, [Dorsett Wanchai, Hong Kong](#) thinks so highly of its guests' wellbeing during the pandemic that room attendants at the hotel not only clean the room, but also clean and disinfect the air with an army of **Robust Air Purifiers with IoT High Efficiency Particulate Air (HEPA) UV-C Technology stationed in all 454 guestrooms and on every guest floor**. Controlled only by a few taps on an iPad, these air purifiers ensure the best indoor air quality and enhance the all-round anti-pandemic measures.

*\*\*\*The selected air purifier has been recognised to be effective by the Food and Environmental Hygiene Department of the Hong Kong Government, eliminating 99.95% of airborne infectious particles of 0.3 microns and 99.9% of germs and mould.*

In April this year, Dorsett Wanchai was recognised as *"One of the Best Hong Kong Hotels for Quarantine"* by *Discovery - Cathay Pacific's* inflight magazine. It was also voted the *"Best Quarantine Hotel in Hong Kong - Silver"* by readers of *Expat Living* in the Readers' Choice Awards of 2021.

Dorsett Wanchai offers the [quarantine package for 7/14/21 nights](#) from **HKD880nett per night, with daily 3 meals and USD65 cash credits** for use during stay.

### **Indoor Air Quality Assured Automatically**

After a thorough deep cleaning by room attendants, every guest room will be further disinfected with the air purifier, which is controlled remotely via mobile App. Arriving guests can rest assured they will be walking into a virus-free room with the best indoor air quality and circulation, with the air purifier running prior to guest arrival.

With real-time indoor air quality in all guest rooms and on every guest floor under the watch of a mobile App, immediate action can be taken to mitigate any risk should there be any problem. The automatic alert system of the App allows the Hotel to take proactive action long before any issue arises.

"We all know the benefits of fresh air - especially now our guests are spending such a long period indoors. Thanks to our smart IoT HEPA UV-C Air Purifiers, we can control, monitor and adjust the air quality in all of our guestrooms in real time, helping to ensure optimal air circulation which, aside from mitigating safety concerns, will also improve sleep quality and mental focus for our guests and give them the energy they need to get through quarantine!" said Ms. Anita Chan, General Manager of Dorsett Wanchai, Hong Kong.
